Thank you, Megan for your input into the worksheet. Here's the completed preliminary accounting. I am working on the "final" based upon the latest Willem run and will provide that later today. Please call me if see anything I missed in the workbook. For instance, there were a couple of cells that had wrong addresses in them so Dave corrected them. The Courtland canal above Lovewell information is still incomplete. I filled some of the values based on estimates or data I obtained from USGS gage at the Stateline, but will be contacting USBR about their values for October, November and December in some of the other cells. The final should contain that info.
